Note: Some historical data are not presented to avoid lack of uniformity in the table.

- a For 2000–2002, the labor force data series includes individuals that are not registered; hence, the sum of the employed and the unemployed is less than the total labor force. Also, the unemployment rate is underestimated because the counts of the unemployed are only based on registered individuals. For 2003 onward, the labor force series is estimated as the sum of the employed and the unemployed which refers to estimates modeled by the International Labour Organization. These estimates use and promote the use of the recommendations of the International Conference of Labour Statisticians. However, for economies where there are not enough data points based on the new standard, the employment definition following the recommendations has yet to be implemented.
- b For 2003 onward, estimated as the sum of the employed and the unemployed, based on estimates modeled by the International Labour Organization.
- c For 2000–2002, included in manufacturing.
- d For 2000–2002, includes mining and quarrying; electricity, gas, steam, and air-conditioning supply; water supply; sewerage, waste management, and remediation activities; and construction.
- e For 2000–2002, included in others.
- f For 2000–2002, included in others. For 2003 onward, includes communication.
- g For 2000–2002, included in others. For 2003 onward, included in transportation and storage.
- h For 2003 onward, includes public administration and defence; compulsory social security, education, and human health and social work activities.
- i For 2000–2010, includes electricity, gas, steam, and air-conditioning supply; water supply; and sewerage, waste management, and remediation activities.
- j For 2011–2015, includes mining and quarrying; electricity, gas, steam, and air-conditioning supply; and water supply; sewerage, waste management, and remediation activities.
- k For 2000–2010, included in mining and quarrying. For 2011–2015, included in manufacturing.
