... = data not available; | = marks break in the series; - = magnitude equals zero; 0 or 0.0 = magnitude is less than half of unit employed; * = provisional, preliminary, estimate; \$ = United States dollars; ₱ = pesos; fob = free on board;

GDP = gross domestic product; GNI = gross national income; IMF = International Monetary Fund; km² = square kilometer; kWh = kilowatt-hour; L = liter; m³ = cubic meter; NPISHs = nonprofit institutions serving households; SDRs = special drawing rights; t = metric ton.

- a For 2000–2009, data are based on the medium assumptions of the 2000 Census of Population and Housing (CPH). For 2010–2014, data are based on the medium assumptions of the 2010 CPH. For 2015–2019, data are based on the low assumptions of the updated 2010 CPH projections using the results of the 2015 Population Census. For 2020, data are as of 1 May 2021 and are based on the 2020 CPH. For 2021, data are based on the low assumptions of the updated projected midyear population for the Philippines using the results of the 2015 Population Census.
- b Data are based on household population of those aged 15 years and older, with past week as reference period. Data are average estimates of the results of the four rounds of the Labor Force Survey (LFS). For 2000–2005, data are based on 1995 census-based population projections. For 2006–2015, data are based on 2000 census-based population projections. For 2005, annual data on labor force and labor force participation rate are averages of April, July, and October figures, in view of the adoption of a new definition (footnote f). For 2014, the January round was not included as it results in a decline in the annual labor force due to very low data, as an aftermath of typhoon Yolanda in late 2013. The estimates for January 2016 were derived using 2000 census-based population projections. Starting with the April 2016 LFS round, the population projection based on the 2010 CPH was adopted to generate labor force statistics. For 2019 onward, annual estimates adopted the 2015 CPH population projections. Starting 2021, the LFS was conducted monthly. Thus, annual estimates for 2021 are based on the average final results of the January, February, March, April, May, June, and July 2021 LFS rounds and preliminary results of the August, September, October, November, and December 2021 LFS rounds.
- c For 2000, data on wholesale and retail trade, repair of motor vehicles and motorcycles, and accommodation and food service activities are consolidated under wholesale and retail trade; repair of motor vehicles.
- d For 2000–2011, data on transportation and storage and information and communication are consolidated under transportation and communication.
- e For 2000, includes real estate activities.
- f From April 2005 onward, the definition of unemployed was revised to include all persons aged 15 years and older and reported as (i) without work; (ii) currently available for work; and (iii) seeking work, or not seeking work due to valid reasons.
- g For comparability, the growth rate for 2014 was calculated using comparable 2013 data equivalent to the average of April, July, and October. The growth rate for 2015 was calculated using the average of April, July, and October employment data that exclude Leyte province. Except for 2005, 2014, and 2015, all other years are averages of January, April, July, and October rounds of the LFS.
- h Data are based on the 2018 base year, following the revision and rebasing of the National Accounts of the Philippines series.
- i Includes administrative and support service activities.
- j Includes NPISHs final consumption.
- k Includes NPISHs.

Philippines

- l Data were converted from barrels to metric tons using a conversion factor of 1 barrel = 7.37 metric tons.
- m Includes exports of condensate.
- n Refers to refinery run and energy uses and losses.
- o Data were converted from standard cubic feet to cubic meters using a conversion factor of 1 standard cubic foot=0.0283168 cubic meter.
- p Refers to prices in the National Capital Region only.
- q Refers to manufacturing sector only. Producer price index for agriculture sector is also available at <https://psa.gov.ph/tags/producer-price-index-agriculture>.
- r For 2001 onward, data series based on the monetary survey concept were revised to adopt the depository corporations survey concept, which expanded the coverage of other depository corporations to include thrift banks, nonstock savings and loan associations, and nonbanks with quasi-banking functions, along with commercial and rural banks.
- s Refers to M3, derived by adding M2 and securities other than shares included in broad money, as defined by the Bangko Sentral ng Pilipinas.
- t Includes transferable and other deposits in foreign currency.
- u Refers to the weighted average interest rates of sample commercial banks.
- v Refers to the annual percentage equivalent of commercial banks' actual monthly interest expenses on peso-savings deposits to the total outstanding levels of these deposits.
- w Refers to rates charged on interest-bearing deposits with maturities of 91–180 days.
- x Refers to rates charged on interest-bearing deposits with maturities of over 1 year.
- y For 2000–2018, data refer to obligation basis. For 2019–2021, data refer to cash basis.
- z For 2000–2013, includes environmental protection.
- aa For 2000–2013, includes recreation, culture, and religion.
- ab For 2000–2013, includes expenditure on recreation, culture, and religion.
- ac Prior to 2005, data are based on the IMF's Balance of Payments Manual (fifth edition). For 2005 onward, data are based on the IMF's Balance of Payments and International Investment Position Manual (sixth edition).
- ad Includes only shipped goods that involve a change in ownership.
- ae Prior to 2005, balances in the financial account were derived by deducting assets from liabilities. For 2005 onward, data are derived by deducting net incurrence of liabilities from net acquisition of financial assets. Negative values of net acquisition of financial assets indicate withdrawal or disposal of financial assets. Negative values of net incurrence of liabilities indicate repayment of liabilities.
- af Prior to 2005, direct investment followed the directional principle, where claims of a direct investment enterprise from its direct investors are recorded as negative entries in assets when the direct investor is a resident and in liabilities when the direct investor is a nonresident. For 2005 onward, data follows the asset and liability principle, where claims of a direct investment enterprise from its direct investors are recorded as reverse investments under assets for claims of residents and liabilities for claims of nonresidents.
- ag "Net unclassified items" is used as an offsetting account to the overstatement or understatement in either receipts or payments of the recorded balance-of-payments (BOP) components vis-a-vis the overall BOP position.
- ah The overall BOP position is calculated as the change in the economy's net international reserves less noneconomic transactions (revaluation and gold monetization or demonetization). Alternatively, it can be derived by adding the current and capital account balances less financial account plus net unclassified items.
- ai Prior to 2005, data for change in reserves are derived by deducting change in reserve assets from change in reserve liabilities. For 2005 onward, data for change in reserves are derived by deducting change in reserve liabilities from change in reserve assets.
