b Labor force is calculated as the sum of people who are employed, those performing unpaid work, and those unemployed.

c For 2009, the figure refers to paid employment.

d Unpaid work includes producing goods mainly for own consumption, voluntary work, and/or unpaid family work.

e Data exclude unpaid work.

f For 2003 onward, there are changes in basic concepts in line with the changing of the base year to 2012 and a closer consistency with the System of National Accounts 2008. Improvements to methodologies, data sources, concepts, and revisions to benchmark estimates have been implemented.

g No rebalancing had been carried out on estimates from 2003 to 2011, and therefore the GDP series by industry structure for this period do not add up.

h For 2003 onward, data are calculated based on the annual population average.

i Figures refer to electricity sales.

Solomon Islands
