

KSTA 9898: 2021 International Comparison Program for Asia and the Pacific Regional Results

About the International Comparison Program

The International Comparison Program (ICP) is the largest worldwide data collection initiative, implemented under the guidance of the United Nations Statistical Commission (UNSC) with the objective of producing comparable price and volume measures of national accounts aggregates across the economies of the world. Along with purchasing power parities (PPPs), the ICP produces price level indexes (PLIs) and other comparable aggregates of gross domestic product (GDP) expenditure and its components.

More specifically, the PPPs are used to compute real measures of GDP, its main aggregates, and selected expenditure aggregates at level below the main aggregates. The main aggregates include individual consumption expenditure by households (ICEH) and nonprofit institutions serving households (NPISH), individual consumption expenditure by government (ICEG), collective consumption expenditure by government (CCEG), government final consumption expenditure (GFCE), gross capital formation (GCF), gross fixed capital formation (GFCF), changes in inventories, acquisitions less disposals of valuables, and balance of exports and imports. These measures allow more meaningful inter-economy comparisons, as they correct for distortions due to differences in the price levels between economies.

The International Comparison Program in Asia and the Pacific

The Asian Development Bank (ADB), through its Economic Research and Development Impact Department, has been the regional implementing agency (RIA) of the ICP for Asia and the Pacific since the 2005 ICP round. ADB in its capacity as the RIA was responsible for coordinating with the 21 economies that participated in the 2021 ICP. These 21 economies are: Bangladesh; Bhutan; Brunei Darussalam; Cambodia; Fiji; Hong Kong, China; India; Indonesia; the Lao People's Democratic Republic; Malaysia; Maldives; Mongolia; Nepal; Pakistan; the People's Republic of China; the Philippines; Singapore; Sri Lanka; Taipei, China; Thailand; and Viet Nam.

Concepts and Measures	
Purchasing Power Parity	The amount of currency units required to purchase a common basket of goods and services in an economy that can be purchased with one unit of the reference currency in the reference economy.
Price Level Index	The ratio of PPP to exchange rate with respect to a common reference currency. PLI expresses the general price level in an economy as percentage of reference economy's price level and shows how the price levels of economies compare with each other. The PLI of the reference economy is 100. A PLI greater than 100 means that when the national average prices are converted at exchange rates, the resulting prices tend to be higher on average than prices in the reference economy.
Real Expenditure	Expenditure in the currency units of an economy converted to a common currency by dividing the expenditure by its corresponding PPP, and hence, valued at a uniform price level across economies.
Nominal Expenditure	Expenditure in the currency units of an economy converted to a common currency using the exchange rate of a reference economy without adjusting for the differences in prices of goods and services across economies.
Per Capita Expenditure	Total expenditure divided by the total population of a given economy. Per capita expenditure measures the standard of living in an economy. This can be expressed either in real or nominal terms.
Per Capita Relative Expenditure	Per capita expenditure that has been converted to the relative units of the reference economy by (i) dividing the per capita expenditure of a given economy by the per capita expenditure of the reference economy and (ii) multiplying by 100.
Transitivity	An important property of PPP whereby the direct PPP between any two economies yields the same result as an indirect comparison via any other economy.
Base Economy Invariance	The property under which the relativities between the PPPs, PLIs, and volume indexes of economies are not affected by the choice of reference economy or currency.
Economy Share to Asia and the Pacific	An economy's real or nominal expenditures for an aggregate, expressed as a percentage of the total real or nominal expenditure of all participating economies in Asia and the Pacific.
Shares of Nominal Expenditure	An aggregate's nominal expenditure as a percentage of the total nominal expenditure within the economy.

Data and Sources

This file has two sheets: one for the 2021 ICP results and second for 2017 ICP (revised) results. Each sheet contains indicators on PPPs, PLIs, and GDP and its components such as ICEH and NPISH, ICEG, CCEG, GFCE, GCF, GFCF, changes in inventories, acquisitions less disposals of valuables, balance of exports and imports, and lower levels of national accounts aggregates. In addition to these, actual individual consumption by households (AICH), which is the aggregate of ICEH, NPISH, and ICEG, is also presented. The five components of AICH are (i) housing, water, electricity, gas and other fuels; (ii) health; (iii) recreation and culture; (iv) education; and (v) miscellaneous goods and services. In contrast, expenditures for the other AICH components of food and nonfood household consumption are incurred by households only. Results are also presented for another broad aggregate called "domestic absorption," which represents the domestic expenditures as aggregate of AICH, CCEG, GFCF, changes in inventories, and acquisitions less disposals of valuables; and "total consumption," which represents the total expenditures of households, NPISH, and the government.

The ICP results are compiled with Hong Kong, China as the reference economy and the Hong Kong dollar as the reference currency. The PPPs for the expenditures aggregates at all levels were derived using the Gini-Éltető-Köves-Szulc (GEKS) method. The real expenditure for each aggregate is derived by dividing the expenditures in local currency units by a PPP that is specific to that aggregate, so real expenditure for such an aggregate may not equal the total of its components' real expenditures within an economy. For expenditures in local currency units, participating economies allocated statistical discrepancy (if any) to one or more basic headings based on their best judgment and financial year-based estimates for some economies were converted to calendar year. Due to these adjustments, the expenditures in local currency units in the table for some expenditure aggregates may differ from the published expenditure estimates by the economies. Some PPPs presented are reference PPPs. Detailed list of reference PPPs will be available in the forthcoming reports of 2021 ICP for Asia and the Pacific. When an economy is not able to provide prices for any of the items for any category corresponding to the available GDP expenditures, the PPP for this category is estimated using gap-filling techniques based on country-product-dummy (CPD) by the RIA.

The 2021 results are in worksheets labeled "AAA-2021," where "AAA" represents the 3-character ADB member code.

The 2017 revised results (in worksheets labeled "AAA-2017 revised," where "AAA" represents the 3-character ADB member code) are based on (i) revisions in the 2017 estimates of GDP, population, and exchange rates; (ii) implementation of a new, hybrid approach of estimating actual and imputed rentals for housing; (iii) revisions in the economy base information for government compensation; (iv) updates in the underlying data to estimate productivity adjustment factors; and (v) changes in some reference PPPs, including the adoption of the two-stage referencing.

Results presented in these tables are produced by ADB as the ICP Asia and the Pacific regional implementing agency, based on data supplied by all the participating economies, in accordance with the methodology recommended by the ICP Technical Advisory Group and endorsed by the 2021 ICP Asia and the Pacific Regional Advisory Board. As such, these results are not produced by participating economies as part of the economies' official statistics.

ACLual individual consumption by households The total value of the ICEH, NPISH, and ICEG at purchasers' prices plus GCF at purchasers' prices plus the FOB value of imports of goods and services. The total value of the ICEH, NPISH, and ICEG at purchasers' prices. Household expenditure on food products and nonalcoholic beverages purchased for consumption away from home by hot street vendors, automatic vending machines, and other vendors, cooked dishes prepared by externing contractors, whether collected by the customer or delivered to the specifically as pet foods. Food Household expenditure on food products purchased for consumption at home. It excludes food products and nonalcoholic beverages spurchased for consumption at home. It excludes food products purchased for consumption of their premises; cooked dishes prepared by externing contractors, which is premised to the specifically as pet foods. Bread and cereals Household expenditure on freely, chilled, frozen, preserved or processed animals and poultry meat phome. It also includes animals and poultry purchased live for consumption as food. Household expenditure on freely, chilled, frozen, preserved or processed animals and poultry meat phome. It also includes animals and poultry purchased live for consumption as food. Milk, cheese and eggs Household expenditure on freely of the customer of processed animals and poultry meat phome. It also includes fish and seafood (such as crustaceans, molluscs and other shellfish, sea snails, land or live for consumption as food. Milk, cheese and eggs Household expenditure on freely of preserved or processed fain and seafood purchased also includes fish and seafood (such as crustaceans, molluscs and other shellfish, sea snails, land or live for consumption as food at home. Household expenditure on butter, mangarine and other vegetable fats such as soya milk, cheese as products purchased for consumption as food at home. Household expenditure on suckers and an action of the products and other food products and c	at home. It excludes expenditures on otels, restaurants, cafés, bars, kiosks, its for consumption off their premises; e customer's home; and products sold ducts sold for immediate consumption achines, etc.; cooked dishes prepared whether collected by the customer or ery products; and pasta products and purchased for consumption as food at d for consumption as food at home. It rabs, land snails and frogs) purchased and curd; and egg including egg-based
Household expenditure on food products and nonalcoholic beverages purchased for consumption food products and nonalcoholic beverages sold for immediate consumption any of street vendors, such as to such as separate by restaurant cooked dishes prepared by catering contractors, whether collected by the customer or delivered to the specifically as pet foods. Food Household expenditure on food products purchased for consumption at home. It excludes food products way from the home by hotels, restaurants, cafés, bars, kiosks, street vendors, automatic vending me by restaurants for consumption of their premises; cooked dishes prepared by catering contractors, delivered to the customer's home; and products sold specifically as pet food. Bread and cereals Household expenditure on fresh, chilled, frozen, preserved or processed animals and poultry meat phome. It also includes animals and poultry purchased live for consumption as food. Household expenditure on fresh, chilled, frozen, preserved or processed animals and poultry meat phome. It also includes fish and seafood Such as crustaceans, molluscs and other shellfish, sea snalls, land or live for consumption as food. Milk, cheese and eggs Household expenditure on fresh or preserved milk, other milk products such as soya milk, cheese as products purchased for consumption as food. Milk, cheese and eggs Household expenditure on butter, margarine and other vegetable fats such as peanut butter; and of consumption as food at home. Fruit Household expenditure on fresh, chilled, frozen, preserved or processed fruit and fruit-based product at home. Household expenditure on fresh, chilled, frozen, preserved or processed regetable and veg for consumption as food at home. Household expenditure on sugar and artificial sugar substitutes; jams, marmalades and hor and ice cream purchased for consumption at home. Household expenditure on sugar and artificial sugar substitutes; jams, marmalades and hor and ice cream purchased for consumption at home. It inclusively and the	otels, restaurants, cafés, bars, kiosks, its for consumption off their premises; e customer's home; and products sold flucts sold for immediate consumption achines, etc.; cooked dishes prepared whether collected by the customer or ery products; and pasta products and purchased for consumption as food at for consumption as food at dor consumption as food at home. It rabs, land snails and frogs) purchased and curd; and egg including egg-based
food products and nonalcoholic beverages sold for immediate consumption away from home by he street vendors, automatic vending machines, and other vendors, cooked dishes prepared by restaurant cooked dishes prepared by catering contractors, whether collected by the customer or delivered to the specifically as pet foods. Food Household expenditure on food products purchased for consumption at home. It excludes food prod away from the home by hotels, restaurants, cafés, bars, kiosks, street vendors, automatic vending me by restaurants for consumption off their premises; cooked dishes prepared by catering contractors, delivered to the customer's home, and products sold specifically as pet food. Bread and cereals Household expenditure on rice; other cereals, flour, and other cereal products; bread; other bake couscous, purchased for consumption at home. Meat Household expenditure on fresh, chilled, frozen, preserved or processed animals and poultry meat phome. It also includes animals and poultry purchased live for consumption as food. Fish and seafood Household expenditure on fresh, chilled, frozen, preserved or processed fish and seafood purchased also includes fish and seafood (such as crustaceans, molluses and other shellfish, sea snails, land or live for consumption as food. Milk, cheese and eggs Household expenditure on fresh or preserved milk, other milk products such as soya milk, cheese an products purchased for consumption as food at home. Fruit Household expenditure on fresh, chilled, frozen, preserved or processed fruit and fruit-based product at home. Food products n.e.c. Household expenditure on fresh, chilled, frozen, preserved or processed vegetable and veg for consumption as food at home. Household expenditure on sauces and condiments; salt, spices and culinary herbs; baby for price only covers the cost of the product; and other food products not elsewhere classified purchased for consumption at home. It sold for immediate consumption away from home by hotels, restaurants, cafés, bar	otels, restaurants, cafés, bars, kiosks, its for consumption off their premises; e customer's home; and products sold flucts sold for immediate consumption achines, etc.; cooked dishes prepared whether collected by the customer or ery products; and pasta products and purchased for consumption as food at for consumption as food at dor consumption as food at home. Clothing and footwear Household expenditure on clothing materials; other articles of clothing and clothing access children, and infants; cleaning, repair, and hire of clothing; all footwear for men, women, chire of footwear.	
Housing, water, electricity, gas and other fuels Household expenditure on actual and imputed rentals for housing; maintenance and repair miscellaneous services related to the dwelling; and electricity, gas, and other fuels plus expe	——————————————————————————————————————
Furnishings, household equipment and routine household maintenance Household expenditure on furniture and furnishings; carpets and other floor coverings; refloor coverings; household textiles; household appliances; glassware, tableware, and household maintenance.	· ·
Health Household expenditure on pharmaceuticals; medical products, appliances, and equipment services plus expenditure of NPISH on health plus ICEG on health benefits and reimbursems services.	
Transportation Household expenditure on purchase of vehicles, operation of personal transport equipment	it, and transport services.
Purchase of vehicles Household expenditure on purchase of new and second-hand motor cars; motor cycles of bicycles; bicycles and tricycles of all types; and animal-drawn vehicles, which include animal and related equipment such as yokes, collars, harnesses, bridles, and reins.	
Transport services Household expenditure on purchases of transport services classified by mode of transport refreshments or accommodation services must be included if covered by the fare and not se transport services but excludes ambulance services and package holidays.	

Expenditure Categories	
Communication	Household expenditure on postal services, telephone and telefax equipment, and telephone and telefax services.
Recreation and culture	Household expenditure on audiovisual, photographic, and information processing equipment; other major durables for recreation and culture; other recreational items and equipment; gardens and pets; recreational and cultural services; newspapers, books and stationery; and package holidays plus expenditure by NPISH on recreation and culture plus ICEG on recreation and culture
Education	Household expenditure on pre-primary, primary, secondary, post-secondary, and tertiary education plus expenditure of NPISH on education plus ICEG on education benefits and reimbursements and the production of education services.
Restaurants and hotels	Household expenditure on food products and beverages sold for immediate consumption away from the home by hotels restaurants, cafés, bars, kiosks, street vendors, automatic vending machines, and other vendors (including cooked dishes prepared by restaurants for consumption off their premises and cooked dishes prepared by catering contractors, whethe collected by the customer or delivered to the customer's home) and household expenditure on accommodation services provided by hotels and similar establishments.
Miscellaneous goods and services	Household expenditure on personal care, personal effects, social protection, insurance, and financial and other services plus expenditure by NPISH on social protection and other services plus ICEG on social protection.
Net purchases abroad	Purchases by residential households in the rest of the world (as tourists, people traveling on business, and government officials crews, border and seasonal workers, diplomatic and military personal stationed abroad) less purchases by nonresidentia households in the economic territory of the country (as tourists, people traveling on business, and government officials, crews border and seasonal workers, diplomatic and military personal stationed abroad). Zero expenditure values for 'Net purchases abroad' may imply that this expenditure category is allocated under other GDP expenditure components based on the best judgments of the implementing agencies of the participating economies.
Individual consumption expenditure by government	The total value of actual and imputed final consumption expenditures incurred by government on individual goods and services These include expenditures incurred by the government considered to be individual services such as housing, health, recreation and culture, education, and social protection.
Collective consumption expenditure by government	The final consumption expenditure of government on collective services or the service provided by the government simultaneously to all members of the community.
Gross capital formation	The total value of expenditure on GFCF, changes in inventories, and acquisitions less disposals of valuables.
Gross fixed capital formation	The total value of acquisitions less disposals of fixed assets by resident institutional units during the accounting period plus the additions to the value of nonproduced assets realized by the productive activity of resident institutional units.
Machinery and equipment	Capital expenditure on fabricated metal products, electrical and optical equipment, general-purpose machinery, special-purpose machinery, and transport equipment.
Construction	Capital expenditure on the construction of new structures and renovation of existing structures. Structures include residential buildings, nonresidential buildings, and civil engineering works.
Other products	Capital expenditure on furniture and other manufactured goods; computer software that a producer expects to use in production for more than one year; plantation, orchard, and vineyard development; change in stocks including breeding stock draught animals, dairy cattle, and animals raised for wool clippings; land improvement, including dams and dikes that are par of flood control and irrigation projects; mineral exploration; acquisition of entertainment, literary, or artistic originals; and other intangible fixed assets such as research and development, weapons and ammunition; and ownership transfer costs or nonproduced assets, including ownership transfer costs relating to land.
Changes in inventories	The value of physical change in inventories of raw materials, supplies and finished goods held by producers; inventories o goods acquired for resale by wholesalers and retailers; inventories of all goods stored by government; work-in-progress in manufacturing, construction and service industries; work-in-progress on cultivated assets (e.g., the natural growth prior to harves of agricultural crops, vineyards, orchards, plantations and timber tracts and the natural growth in livestock raised for slaughter)
Acquisitions less disposals of valuables	Acquisitions of valuables (produced assets, such as nonmonetary gold, precious stones, antiques, paintings, sculptures and other art objects, that are not used primarily for production or consumption but purchased and held as stores of value) less disposals of valuables.
Balance of exports and imports	The FOB value of exports of goods and services less the FOB value of imports of goods and services.
Individual consumption expenditure by households	The total value of actual and imputed final consumption expenditures incurred by households for goods and services consumed by the households. In the context of ICP in Asia and the Pacific, also includes the individual consumption expenditure by NPISH and the Pacific of the Asia and the Pacific of the ICP in Asia and the ICP in Asia and the Pacific of the ICP in Asia and the ICP in Asia
Individual consumption expenditure by households without housing	ICEH and NPISH, without actual and imputed rentals for housing and excluding expenditure by NPISH on housing.
Government final consumption expenditure	The total value of actual and imputed final consumption expenditures incurred by government on individual goods and services and final consumption expenditure of government on collective services.
Domestic absorption	AICH at purchasers' prices plus CCEG at purchasers' prices plus GFCF at purchasers' prices plus changes in inventories, and acquisitions less disposals of valuables.
Total consumption	AICH plus CCEG, both at purchasers' prices.

AICH = actual individual consumption by households; CCEG = collective consumption expenditure by government; FOB = free on board; GCF = gross capital formation; GDP = gross domestic product; GFCE = government final consumption expenditure; GFCF = gross fixed capital formation; ICEG = Individual consumption expenditure by government; ICEH = individual consumption expenditure by households; NPISH = nonprofit institutions serving households; n.e.c = not elsewhere classified.

 ^{- =} magnitude equals zero.
 AP = Asia and the Pacific; HK\$ = Hong Kong dollar; HKG = Hong Kong, China; LCU = local currency units; n.a. = not applicable; n.e.c. = not elsewhere classified.
 a Includes individual consumption expenditure by households, nonprofit institutions serving households, and government.
 b Includes expenditure by nonprofit institutions serving households.

Notes:

1. Each real aggregate value is derived by using a purchasing power parity that is specific to that aggregate, so real aggregates may not sum up to the total of their real components for an economy.

2. Expenditure aggregates presented in local currency units are the best possible estimates provided by the participating economies, using most recent available data sources, and some of these aggregates may be different from the published expenditure estimates by the participating economies for the International Comparison Program.

3. Data for mid-year population estimates and exchange rates were supplied by the participating economies for the International Comparison Program.

 ^{- =} magnitude equals zero.
 AP = Asia and the Pacific; HK\$ = Hong Kong dollar; HKG = Hong Kong, China; LCU = local currency units; n.a. = not applicable; n.e.c. = not elsewhere classified.
 ^a Includes individual consumption expenditure by households, nonprofit institutions serving households, and government.
 ^b Includes expenditure by nonprofit institutions serving households.

Notes:

^{1.} Each real aggregate value is derived by using a purchasing power parity that is specific to that aggregates, so real aggregates may not sum up to the total of their real components for an economy.

2. Expenditure aggregates presented in local currency units are the best possible estimates provided by the participating economies, using most recent available data sources, and some of these aggregates may be different from the published expenditure estimates by the participating economies for the International Comparison Program.

3. Data for mid-year population estimates and exchange rates were supplied by the participating economies for the International Comparison Program.
