Debt service (% of exports of goods and services)

... = data not available; | = marks break in series; - = magnitude equals zero; 0 or 0.0 = magnitude is less than half of unit employed; \$ = United States dollars; cif = cost, insurance, and freight; fob = free on board;

GDP = gross domestic product; GNI = gross national income; HK\$ = Hong Kong dollars; IMF = International Monetary Fund; km² = square kilometer; kWh = kilowatt-hour; L = liter; NPISHs = nonprofit institutions serving households; SDRs = special drawing rights; t = metric ton.

- a Data refer to resident population.
- b Excludes marine population and area of reservoirs. Figures refer to end of June for each year.
- c Annual figures are compiled based on data collected in the General Household Survey from January to December of the year concerned, as well as on midyear population estimates.
- d Figures less than 0.005 million are shown as "0.00".
- e "Others" includes electricity and gas supply; water supply; sewerage, waste management, and remediation activities; public administration; and social and personal services.
- f Refers to import, export, and wholesale trades only.
- g Data include activity for postal and courier services.
- h Refers to retail, accommodation, and food services. Accommodation services cover hotels, guesthouses, boardinghouses, and other establishments providing short-term accommodation. The retail, accommodation, and food services industries as a whole are generally referred to as the consumption- and tourism-related segment.
- i Data include professional and business services.
- j GDP by economic activities is compiled based on the Hong Kong Standard Industrial Classification Version 2.0 and worked back to 2000.
- k The overall GDP level compiled using the expenditure approach is adopted as the single measure of GDP. The sum of value-added of respective economic activities at current basic prices plus taxes on products plus statistical discrepancy is equal to GDP by expenditure component at current market prices.
- l Refers to electricity, gas, and water supply; and waste management.
- m Refers to import, export, wholesale, and retail trades.
- n Accommodation services cover hotels, guesthouses, boardinghouses, and other establishments providing short-term accommodation.
- o Refers to professional and business services.
- p Refers to public administration, social services, and personal services.
- q Refers to ownership of premises.
- r Refers to agriculture, fishing, mining, and quarrying.
- s Refers to manufacturing; electricity, gas, steam, and air-conditioning supply; water supply; sewerage, waste management, and remediation activities; and construction.

Hong Kong, China

- t Refers to import, export, wholesale, and retail trades; accommodation and food services; transportation, storage, postal, and courier services; information and communications; financing and insurance; real estate, professional, and business services; public administration, social services, and personal services; and ownership of premises.
- u Acquisitions less disposals of valuables are not compiled.
- v The statistics on trade in goods and services are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the System of National Accounts 2008.
- w Data include final consumption of NPISHs.
- x GDP and real GNI in chained (2019) dollars compiled using the annually reweighted chain-linking approach have been rereferenced from 2018 to 2019. Component and aggregate data series are estimated separately using component and aggregate indexes, thereby losing additivity.
- y Refers to balance on secondary income.
- z From the reference year of 2008 onward, the index of industrial production and producer price index for manufacturing industries are compiled based on the Hong Kong Standard Industrial Classification Version 2.0, which adopts the basic framework and principles of the International Standard Industrial Classification of All Economic Activities Revision 4.
- aa Figures within 500 metric tons are shown as “0.0”.
- ab The average monthly household expenditure (in Hong Kong dollars) of the consumer price index (CPI) was HK\$5,500–HK\$89,999, with the base period of October 2014–September 2015. From October 2014 onward, the CPIs are compiled based on expenditure weights obtained from the 2014/2015 Household Expenditure Survey. Prior to October 2014, the CPIs were compiled based on old weights and have been rescaled to the new base period for linking with the new index series. In deriving the year-on-year rates of change, indices of more than one decimal place are used in the calculation. The year-on-year rates of change before October 2015 were derived using the index series in the base periods at that time (for instance the 2009/2010–based index series), compared with the index a year earlier in the same base period.
- ac Refers to manufacturing industries.
- ad Not applicable to Hong Kong, China.
- ae Data on claims on public nonfinancial corporations is not available.
- af Broad money liabilities are not equivalent to M2 because M2 includes liabilities to nonresidents.
- ag Including other items (net), i.e. other liabilities less other assets.
- ah M2 is the sum of legal tender notes and coins held by the public plus customers’ demand deposits placed with banks plus customers’ savings and time deposits with banks plus negotiable certificates of deposit issued by banks held outside the banking sector.
- ai In accordance with the accounting rules adopted in the IMF’s Balance of Payments and International Investment Position Manual (sixth edition), a positive value for the balance figure in the current and capital account represents a surplus, whereas a negative value represents a deficit. In the financial nonreserve assets, increases in net financial assets and net financial liabilities are shown with positive signs, and net transactions are computed by subtracting the liabilities from the assets. Thus, a positive value in the net transactions represents a net lending, while a negative value represents a net borrowing. For the overall balance of payments, a positive value represents a surplus, whereas a negative value represents a deficit.
- aj Data are the sum of quarterly figures converted from Hong Kong dollars to United States dollars, using the average of period exchange rates from the IMF.
- ak For purposes of analysis, a positive value in reserves and related items represents a net decrease, while a negative value represents a net increase.
- al Net international investment position is the difference between total external financial assets and total external financial liabilities. Figures were converted from Hong Kong dollars to United States dollars, using the end of period exchange rates from the IMF.
- am For 2002 onward, data include debt liabilities under direct investment relationships.
