... = data not available; | = marks break in series; 0.0 = magnitude is less than half of unit employed; - = magnitude equals zero; * = provisional, preliminary, estimate; \$ = United States dollars; A\$ = Australian dollars; fob = free on board; GDP = gross domestic product; GNI = gross national income; IMF = International Monetary Fund; km² = square kilometer; kWh = kilowatt-hour; SDRs = special drawing rights.

- a The total population size for years between census years is estimated by intrapolating from the average annual growth between census years. Census years were 2000, 2005, 2010, and 2015. For 2018, data are based on Household Listing and not census.
- b Data refer to population aged 15 years and older.
- c For the entire time series, the total number of employed refers to the number of members of the labor force who are engaged in cash work and unpaid village work. For 2005, the total number of employed by industry refers to the number of members of the labor force who are engaged in cash work (i.e., paid work). As such, the number of employed for all industries may not add up to the total number of employed, which includes both cash workers and unpaid village workers.
- d For 2005, data refer to agriculture and fisheries.
- e For 2005, data refer to electricity. For 2010, data refer to utilities, repair, and installation of equipment.
- f For 2005 and 2010, data refer to construction and related activities.
- g For 2005, data refer to hotels and motels.
- h For 2005, data refer to transport and communication. For 2010, data refer to transportation, storage, and courier activities.
- i For 2005, data refer to financial services. For 2010, data refer to financial, insurance, and real estate activities.
- j For 2005, data include public administration, sanitary services, education services, medical services, welfare institution, professional bodies, church services, entertainment, library, repair services, laundry services, household services, personal services, and international bodies. For 2010, data include professional, scientific, and technical activities; administrative and support service activities; public administration and defense; compulsory social security; education; human health and social work activities; arts, entertainment, and recreation; other service activities; activities of households as employers; undifferentiated goods- and services-producing activities of households for own use; and activities of extraterritorial organizations and bodies.
- k For 2005, the total unemployed include paid (cash work) workers only. For 2010, the unemployed include both cash workers and village workers. As such, unemployment figures for 2005 and 2010 may not be directly comparable.
- l For 2005 onward, data may not be directly comparable with estimates for years prior to 2005 due to significant improvements in methodology and use of improved data.
- m Data refer to agriculture and fishing.
- n Data refer to wholesale and retail trade.
- o Data refer to hotels and restaurants.
- p Data refer to communications.
- q Data refer to financial intermediation.
- r Data refer to real estate (housing business).
- s Data refer to business services.
- t Data refer to the government sector.
- u Data refer to other community, social, and personal services.
- v GDP growth rates are calculated using GDP at market prices, which includes taxes and subsidies on production and imports. For agriculture, industry, and services, growth rates are calculated at basic prices. As such, GDP growth rates may fall outside the range of sectoral-level growth rates.
- w Per capita GDP and GNI are calculated using population data from national accounts adjusted to year end as denominator.
- x For 2006 onward, refers to the Tarawa Retail Price Index. The index is collected data on South Tarawa, which represents data for all of Kiribati.
- y Data refer to the weighted average of food and nonalcoholic drinks price indexes.
- z Data refer to the weighted average of utilities and housing price indexes.
- aa Data include education.
- ab Data included in health.
- ac The reference periods for government finance statistics and GDP at current market prices are different. The reference year for government finance statistics is fiscal year ending June and while it is calendar year for GDP.
- ad For 2000–2005, data follows the IMF's Balance of Payments Manual (fifth edition). For 2006 onward, data follows the IMF's Balance of Payments and International Investment Position Manual (sixth edition).
- ae Data include balance on repairs and procured goods.
