New Zealand

... = data not available; | = marks break in series; 0 or 0.0 = magnitude is less than half of the unit employed; - = magnitude equals zero; * = provisional, preliminary, estimate, budget figure; \$ = United States dollars; cif = cost, insurance, and freight; fob = free on board; GDP = gross domestic product; GNI = gross national income; IMF = International Monetary Fund; km² = square kilometer; kWh = kilowatt-hour; L = liter; NPISHs = nonprofit institutions serving households; NZ\$ = New Zealand dollars; SDRs = special drawing rights; t = metric ton. A base year represented as, e.g. 2009/10, corresponds to the fiscal year (e.g. beginning 1 April 2009 and ending 31 March 2010) and related data is presented under a single year caption (e.g. 2009) under which most of the fiscal year falls.

- a Refers to the population aged 15 years and older.
- b For 2000–2002, data are based on the Quarterly Employment Survey of businesses designed to produce estimates of the number of filled jobs by industry. A filled job (or occupied position) is the total number of all employees at each business location, plus the number of working proprietors counted by the survey. For 2003 onward, data are based on the Household Labour Force Survey, where all people aged over 15 years are asked if they are employed (among other things).
- c Refers to unallocated taxes on production and imports, finance service charges, and balancing items.
- d Includes NPISHs.
- e Chain-volume series are not additive (i.e., the chain-volume series for an aggregate will not equal the sum of the values of its components). For a full explanation, see the report Chain Volume Measures in National Accounts, available on the Statistics New Zealand website, www.stats.govt.nz
- f Includes condensate and naphtha production.
- g Data are recorded based on fiscal year ending 30 June.
- h Refers to food and nonalcoholic beverages and the restaurant component of the “Restaurants and hotels” classification of individual consumption by purpose (COICOP) group.
- i Includes alcoholic beverages, tobacco, and narcotics.
- j Refers to transaction balances (checks) only; excludes government deposits.
- k Refers to net electronic funds transfer at point of sale, such as cash card, etc., and other total call funding.
- l For 2016 and 2017, data are based on new data collection methods for banks, implemented by the Reserve Bank of New Zealand in 2017. With the new data collection methods, New Zealand’s monetary aggregates are now internationally compliant and the broad money series aligns with M2, thus, the compilation of M3 is no longer necessary.
- m Refers to net foreign currency assets.
- n Refers to transaction balances (checks) and electronic funds transfer at point of sale (excluding checks).
- o Includes term deposits.
- p Excludes those of the Reserve Bank of New Zealand; refers to claims on government, public entities, and the private sector.
- q For 2009 onward, includes net investment on nonfinancial assets and capital grants.
- r For 2009 onward, refers to net operating balance, which is also equal to the sum of net lending and net investment on nonfinancial assets.
- s Refers to Crown government expenditures with fiscal year ending 30 June.
- t Includes law and order.
- u Refers to recreation and culture.
- v Figures were converted from New Zealand dollars to United States dollars using the average annual exchange rate for NZ\$–\$, calculated from monthly average data that is sourced from the Reserve Bank of New Zealand.
- w Financial account is calculated as the sum of direct investment, portfolio investment, financial derivatives, and other investment less reserves and related items.
