... = data not available; | = marks break in the series; - = magnitude equals zero; 0 or 0.0 = magnitude is less than half of unit employed; \* = provisional, preliminary, estimate; \$ = United States dollars; ₱ = pesos; fob = free on board; GDP = gross domestic product; GNI = gross national income; IMF = International Monetary Fund; km<sup>2</sup> = square kilometer; kWh = kilowatt-hour; L = liter; NPISHs = nonprofit institutions serving households; SDRs = special drawing rights; t = metric ton.

- a Data for 2000–2009 are based on the population estimates used for national accounts and the computed annual and end-quarter population estimates curvilinear interpolation at decelerating rates. The results of the 2000 and 2010 Censuses of Population and Housing (CPH) are, respectively, the start and end dates of the reference population. Data for 2010 onward are updated based on the 2010 CPH. Definition of urban barangays is based on Board Resolution No. 9, series of 2003.
- b Data are based on household population of 15 years old and over, with past week as reference period. Data are average estimates of the results of the four rounds of the Labor Force Survey (LFS). Data for 2000–2005 were based on 1995 census-based population projections, while data for 2006–2015 were based on 2000 census-based population projections. For 2005, annual data on labor force and labor force participation rate are averages of April, July, and October figures, in view of the adoption of a new definition (footnote c). For 2014, the January round was not included as it results in a decline in the annual labor force due to very low data, as an aftermath of typhoon Yolanda in late 2013. The estimates for January 2016 were derived using 2000 census-based population projections. Starting with the April 2016 LFS round, the population projection based on the 2010 CPH was adopted to generate labor force statistics.
- c Beginning April 2005, the definition of unemployed was revised to include all persons who are 15 years old and over and are reported as (i) without work; (ii) currently available for work; and (iii) seeking work, or not seeking work due to valid reasons.
- d For comparability, growth rate for 2014 was computed using comparable 2013 data equivalent to the average of April, July, and October. Growth rate for 2015 was computed using the average of April, July, and October employment data that exclude Leyte province. Except for 2005, 2014, and 2015, all other years are averages of January, April, July, and October rounds of the LFS.
- e Compilation follows the 2000 Revised/Rebased Philippine System of National Accounts.
- f Gross value added at basic current prices were derived using the data on taxes on production and imports in the Consolidated Accounts and Income and Outlay Accounts of the Philippine Statistics Authority.
- g Includes NPISHs.
- h Data for 2000–2009 were derived using balance of secondary income data from the balance of payments. Data for 2010–2016 were provided by the Philippine Statistics Authority.
- i Per capita figures were adjusted following the use of 2000–2012 population estimates based on 2010 CPH results (footnote a).
- j Data were converted from barrels to metric tons using a conversion factor of 1 barrel=0.15897882 metric tons.
- k Refers to refinery run and energy uses and losses.
- l Includes nonalcoholic beverages.
- m Does not include alcoholic beverages, tobacco, and narcotics.
- n Beginning 2001, data series based on the monetary survey concept were revised to adopt the depository corporations survey concept, which expanded the coverage of other depository corporations to include thrift banks, nonstock savings and loan associations, and nonbanks with quasi-banking functions, along with commercial and rural banks.
- o For 2000, includes in claims on government sector (net).
- p For 2000, includes in claims on private sector.
- q Liabilities excluded from broad money (Other Liabilities) beginning 2001.
- r Refers to the weighted average interest rates of sample commercial banks.
- s For 2012 onward, rates are charged on interest-bearing deposits with maturities of 91–180 days; previous data refer to rates charged on interest-bearing deposits with short-term maturities (1 year and below).
- t Refers to rates charged on interest-bearing deposits with maturities of over 1 year.
- u For 2014 onward, data series were revised to adopt the IMF Government Finance Statistics Manual 2014 concept wherein reporting of debt amortization reflect the actual principal repayments to creditor including those serviced by the Bond Sinking Fund; while financing includes gross proceeds of liability management transactions such as bond exchanges.
- v On obligation basis.
- w Includes agrarian reform and natural resources.
- x Includes trade and tourism.
- y Includes subsidy to local government units.
- z Includes other social services, social service subsidy to local government units, net lending, debt service, and land distribution.
- aa Data prior to 2005 are based on the IMF's Balance of Payments Manual (fifth edition); data from 2005 onward are based on the IMF's Balance of Payments and International Investment Position Manual (sixth edition).

# Philippines

ab Includes only shipped goods that involve a change in ownership.

ac Prior to 2005, balances in the financial account are derived by deducting assets from liabilities, while data from 2005 onward are derived by deducting net incurrence of liabilities from net acquisition of financial assets.

Negative values of net acquisition of financial assets indicate withdrawal or disposal of financial assets; negative values of net incurrence of liabilities indicate repayment of liabilities.

ad Prior to 2005, direct investment follows the directional principle, where claims of direct investment enterprise from its direct investors are recorded as negative entries in assets when the direct investor is a resident and in liabilities when the direct investor is a nonresident.

Data from 2005 onward follows the asset and liability principle, where claims of direct investment enterprises from its direct investors are recorded as reverse investments under assets for claims of residents and liabilities for claims of nonresidents.

ae "Net unclassified items" is used as an offsetting account to the overstatement or understatement in either receipts or payments of the recorded balance of payments (BOP) components vis-a-vis the overall BOP position.

af Overall BOP position is calculated as the change in the country's net international reserves less noneconomic transactions (revaluation and gold monetization or demonetization). Alternatively, it can be derived by adding the current and capital account balances less financial account plus net unclassified items.

ag For data prior to 2005, change in reserves is derived by deducting change in reserve assets from change in reserve liabilities. For data from 2005 onward, change in reserves is derived by deducting change in reserve liabilities from change in reserve assets.
